

Amphasys AG

Reinventing Single Cell Analysis

We are a highly innovative and internationally active high-tech company, specialized in pollen quality analysis for the seed industry. We provide technology and services based on our patented microchip technology. For the further market development we are looking for a

Senior Consultant/Supporter

with experience in the seed production industry. In this important function you will take over responsibility for the successful rollout and implementation of our technology to seed companies. Your main tasks will include:

- Plan and execute proof-of-concept projects for seed companies including design of experiments, data analysis and presentation of findings
- End-to-end consulting and on-site training of customers from pollen collection and storage to sample preparation and analysis
- After-sales support including installations of instruments, customer care, application support and preventive maintenance
- Collect customer feedback and understand customer needs and interests
- Interact closely with the sales and the R&D teams to constantly improve products and services

You have a service-oriented personality and are willing to travel extensively. Your specific experience and drive help you to work independently, efficiently and reliably on a high quality level. We expect the following qualifications for this important position:

- Master level in Natural Sciences, preferably in plant biology or agronomy
- Several years of experience with plant breeding and seed production, excellent understanding of cell biology, ideally also with pollen
- Entrepreneurial spirit, communicative and customer-oriented senior personality with a natural affinity to support, training and project collaboration
- Strong organizational skills, able to plan, initiate and execute implementation projects with customers
- Excellent skills in English. Spanish, French, Chinese and other languages are of major advantage.

What we offer:

- A versatile work environment in a young, emerging company with an enthralling technological background
- An interdisciplinary and inspiring working atmosphere, close to the management, with the potential for professional development
- A modern workplace at Technopark Lucerne with great infrastructure and easy accessibility

Are you interested and committed to play a crucial role for the success of our company? Then we are looking forward to receive your detailed application including picture which you please send by e-mail to marcel.ottiger@amphasys.com.
