For regular pollen measurements, download the pollen viability collection from the website.

The *Pollen Counting Quick Guide* contains valuable tips for experimental setup.

Download Counting  
Template Collection

If a template for a specific species you might need is missing, please contact us at [support@amphasys.com](mailto:support@amphasys.com)

### Download at

[amphasys.com/amphasys-downloads](https://amphasys.com/amphasys-downloads)

### Download and use

- Download the template collection
- Unzip the template collection
- Open the template collection folder
- Create a copy of the desired template
- Rename the copy. This will be your workspace
- Open AmphaSoft and load the workspace

### Tips

- Use our *Quick Guide* about Pollen Counting to set up your experiments.
- Keep on copying the original template folder to create individual workspaces

### Support

If you need support for the template management and cannot find a solution in the *AmphaSoft User Guide* or our *Quick Guides*, contact us at
