

# Amphasys AG

*Reinventing Single Cell Analysis*

We are an innovative and globally active high-tech company, specialized in cell analysis with a focus on the seed and food industry.

We believe that cells hold the key to a sustainable future. Our mission is to unlock the full potential of cellular applications by supplying innovative and mobile cell analysis solutions based on our patented microchip technology.

To ensure efficient production of our next generation product line at high quality we are looking for a

## Technical Supply Chain Manager

with at least 3 years of experience. In this important and versatile function, you will manage production and take care of our internal supply processes. Your main tasks will include:

- Plan, assess, and coordinate production needs in close collaboration with our Sales and Support teams.
- Identify suitable suppliers, prepare, and help to negotiate terms and conditions, and conduct supplier audits.
- Monitor and supervise suppliers, ensuring prompt deliveries in compliance with agreed quality standards.
- Transfer latest innovations and design updates to production in close collaboration with our R&D team.
- Maintain items, products and supplier master data in ERP system to ensure capability to fulfill customers' orders.
- Collaborate closely with the Support, R&D, and Sales teams to optimize, automate, and digitize relevant business processes, aid the implementation of these improvements, and provide support to the teams as needed.

You have a service-oriented attitude and a well-organized, purposeful working style. Your self-motivation and drive help you to work efficiently and reliably at a high-quality level. We expect the following qualifications for this position:

- Bachelor in a technical or scientific field or specialist in business administration and applied technical management with a federal diploma of higher education.
- Background in supply chain activities within a technical domain, preferably running under regulated quality standards.
- Experience in handling products of moderate to high complexity, consisting of tens to hundreds of subcomponents.
- Open, communicative personality with good technical skills and a genuine passion for technology and life sciences.
- Excellent IT skills, including Microsoft Office and CRM or ERP tools.
- Excellent skills in German and English.

What we offer:

- A versatile work environment in a young, emerging company with an enthralling technological background.
- An interdisciplinary and exciting working atmosphere, close to the management, with the potential for professional development.
- A modern workplace at Technopark Lucerne with great infrastructure and easy accessibility.

Are you interested and committed to playing a crucial role for the success of Amphasys? Then we are looking forward to receiving your application including CV, motivation letter, references, and educational certificates, which you please send by e-mail to [marco.diberardino@amphasys.com](mailto:marco.diberardino@amphasys.com).
